

VRT RFQ # 42026-27

Q1. Would a pair of handheld radios suffice for coverage testing?

A1. VRT will accept handheld radios for use in testing.

Q2. Thinking of the three (3) Control Station locations, is there a garage available for installation usage in case of inclement weather, etc?

A2. VRT has a garage location in Purcellville VA for its NOVA Buses and in Culpeper VA for its Central Buses and would make a bay accessible for the selected contractor to do installs.

Q3. Can you provide the bus models (?) or any cab configurations that might affect installation and operation of the radios by the drivers.

A3. Over 90% of the fleet for installations are Ford E series buses. Pictured below is the rural fleet listing:

355	2018 Ford E450 STARCRAFT	Purcellville VA
